Text the **CODES** below to **33733** to receive short, informational videos right on your phone!

## Dental Fillings

A filling is a relatively quick, painless, and simple procedure. Watch to learn why a filling may be needed, and how the procedure is done.

Text **SMILE F** To **33733**

## Teeth Cleaning

A cleaning is the most routine of dental visits. However, gum disease and other factors may require more frequent and thorough appointments. Learn about the different types of cleanings, and which one may be best for you.

Text **SMILE TC** To **33733**

## Extractions

An extraction may be necessary to relieve pain, and while often thought of as a last resort option, having a tooth extracted may also prevent other potential problems. Watch to learn more.

Text **SMILE E** To **33733**

## Root Canal

In most cases, a root canal procedure is no more uncomfortable for the patient than a simple filling. Learn about how the procedure is done, and why it may be needed to save your tooth.

Text **SMILE RC** To **33733**

## Teeth Whitening

Want a whiter and brighter smile? Learn about your options, including a professional in-office whitening procedure, and a simple at-home treatment made custom for you.

Text **SMILE TW** To **33733**

## Dental Implants

A dental implant can be a permanent solution to replace one or more missing teeth. Learn more about dental implants, and why they may or may not be an option for you.

Text **SMILE DI** To **33733**

## Dental Veneers

See how dental veneers can change the size, shape, and color of your teeth to give you a smile you will be proud to show off!

Text **SMILE DV** To **33733**

## Dental Crowns

A custom-made crown is both a functional, and esthetically pleasing option to restore a broken or weak tooth to its original functionality. Watch to learn more about crowns, and how they are made.

Text **SMILE DC** To **33733**

## Dentures

A denture is a removable appliance that can replace one or more missing teeth. Learn about the advantages, and disadvantages of dentures, and why they may or may not be the right choice for you.

Text **SMILE D** To **33733**

## Teeth Grinding

Teeth grinding can be a potentially serious problem that you may not even know you suffer from. Learn about the signs and symptoms of teeth grinding, and what you can do about it to protect your teeth.
